

e-zone

DUCTED AIR-CONDITIONING.

ADVANTAGE AIR®

A TOUCHSCREEN THAT'S ALSO A TABLET.

e-zone's 7-inch colour touchscreen doubles as a tablet. Now you can manage your comfort and your home from one central hub.

The e-zone screen is easy to read and simple to navigate. As the touchscreen is integrated with both the air management system and air-conditioning unit, you can control every function from the one screen. With the touch of a button you can see which rooms are receiving air and how much, open and close zones, set schedules and turn the air-conditioner on or off.

You can control the rest of your home with the same ease. With a touch of the Android icon you can stay in touch with loved ones, search a recipe, watch videos while you cook... As the touchscreen is wired to the wall, it never goes missing and never needs charging.

MORE CONTROL AND CONVENIENCE WITH THE e-zone APP.

The e-zone app turns your other smart devices into additional remote controls. It works through your Wifi, and lets you access and control your air-conditioning both from within the home and anywhere in the world.

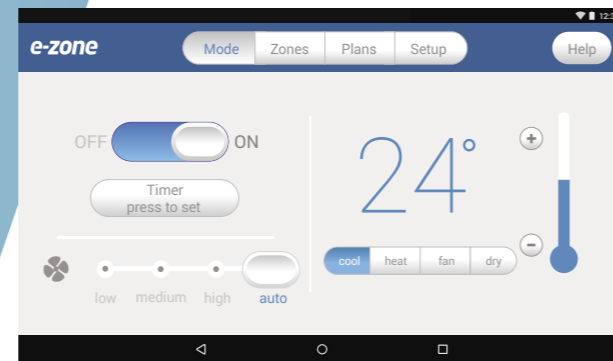

True comfort is being in total control.

For compatibility details visit advantageair.com.au/support

CONTROL IS INTUITIVE

The e-zone touchscreen controls both the air management system as well as the air-conditioning unit. If you know how to use a tablet or iPad, then you already know how to use it. Simply tap on the function you want and follow the prompts. We've designed the system to be as intuitive to use as possible and if you ever need it, there is always a HELP button available on each screen.

HOME SCREEN

On the left side of the screen, you can turn the system On or Off, select your Fan Speed, and set a Timer. On the right side of the screen you can change the Mode and set your desired temperature by pressing the +/- buttons

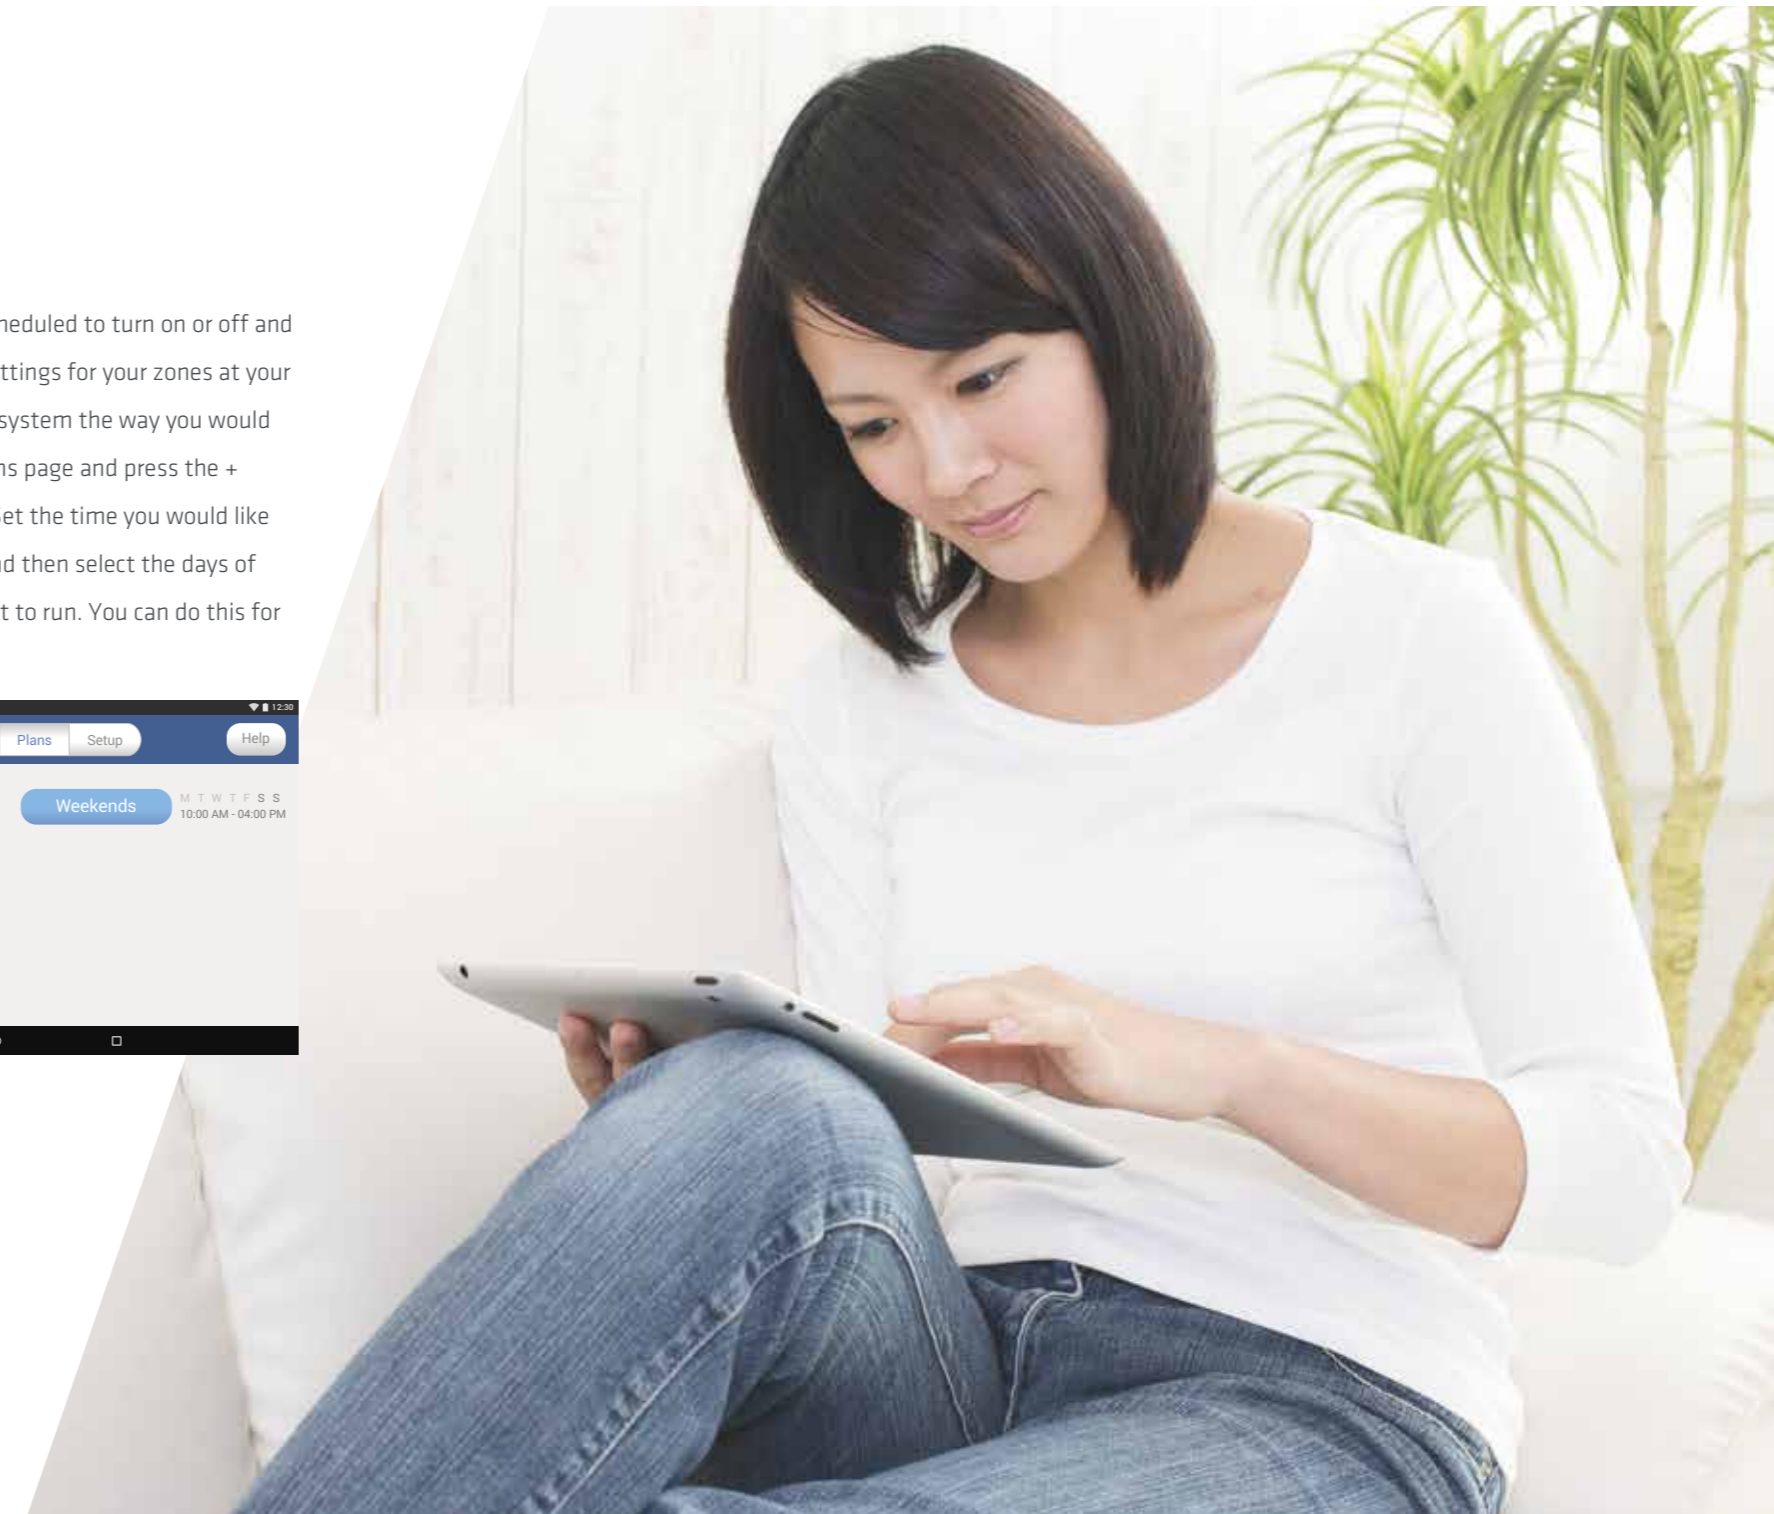

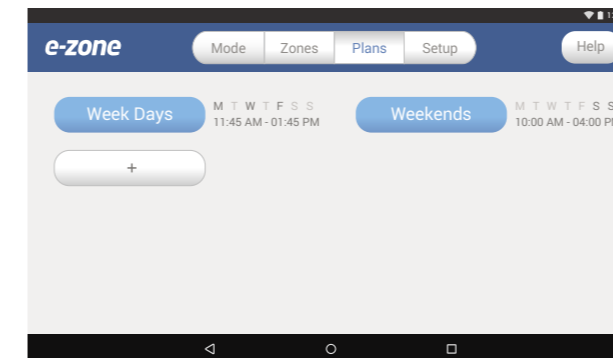

ZONES

To control how much air goes where, press the Zones button. The Zones screen will display every room in your home. To open or close a zone, simply tap on the room name, or to adjust the airflow press the plus or minus button. If the room has a temperature sensor, the number displayed will be the temperature desired in that zone.

PLANS

Your e-zone system can be scheduled to turn on or off and run a pre-selected series of settings for your zones at your required time. Simply set the system the way you would like it to be, and go to the Plans page and press the + button to create a new plan. Set the time you would like that plan to start and stop, and then select the days of the week that you would like it to run. You can do this for up to 10 different plans.

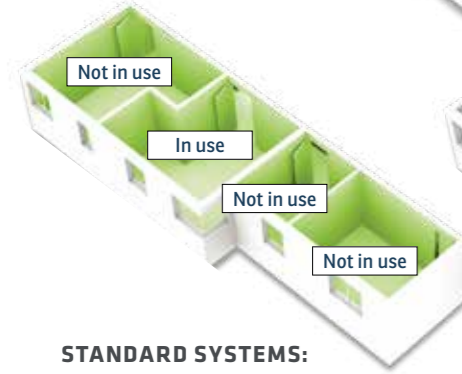

ENGINEERED TO SAVE ENERGY WITH 10 ZONES.

e-zone is engineered for improved air management and maximum energy efficiency. As e-zone has up to 10 zones, each room can be controlled independently. You control which rooms receive conditioned air so there's no paying to heat or cool empty rooms.

This is in contrast to standard systems that have only 4 or 5 zones, and therefore have to group several rooms in each zone. You may only be using 3 rooms, but due to limited zoning you could be paying to run the system in nearly the whole house.

STANDARD SYSTEMS:

If all bedrooms are on one zone, they are all air conditioned together, even when some are not in use.

E-ZONE:

When every room is zoned separately you only air-condition the rooms you are using.

PRECISION AIRFLOW FOR PERFECT COMFORT.

You not only control which rooms receive air, you determine how much. With e-zone you can adjust the airflow to any room from 5 to 100% output, in 5% increments. Everyone can customise the airflow to their room, to their personal preference.

THE OPTION OF INDIVIDUAL TEMPERATURE CONTROL.

There can be huge temperature discrepancies between different rooms in your house, depending on their orientation to the sun and whether they are upstairs or downstairs. With standard systems, hot and cold spots are unavoidable as they only have one thermostat, with no option to adjust the airflow to each room.

With e-zone, you have the ability to manually send more air to the hotter rooms. However, if you'd prefer everything to be adjusted automatically, there's Individual Temperature Control (ITC). Each ITC sensor is like a thermostat, they

instruct the system to continually adjust the airflow to maintain your selected temperature.

We particularly recommend installing ITC in the hotter rooms or upstairs rooms to ensure they stay the temperature you want as the day heats up. ITC in the baby's room will give you peace of mind knowing your little one isn't getting overheated or chilled. Sensors can be installed in as many rooms as you like, either at the time of installation or later on.

As ITC sensors ensure you won't be over air-conditioning rooms, they have the added bonus of saving energy.

MORE CHOICE WITH MYZONE.

On your touchscreen, you'll notice one room has a dark grey thermometer symbol next to it.

This indicates it has been selected as the MyZone, the room that acts as a thermostat for the system. MyZone can be any room with an ITC sensor, and it gives you more choice and control over how you run your air-conditioning.

For optimum comfort in summer, select the hottest room in your home as MyZone. This ensures every room with ITC will achieve the temperature you have set. The MyZone feature is optional - ask your e-zone Dealer about this feature.

e-zone's Exact Air Regulator
was awarded an Australian Design Mark award for innovation

Standard Systems

- Conventional dampers and internal 'scoop'
- Imprecise

THE COMPONENTS OF PRECISION AIR MANAGEMENT.

In standard systems, dampers look like a large metal tube with a circular internal scoop that pivots to increase or decrease airflow. As the scoop opens a little, very little change in airflow occurs. As it opens a little more, you get a large change in airflow due to its shape.

As we couldn't achieve the level of airflow control we were after with conventional dampers, we designed our own: the Exact Air Regulator. Instead of a single scoop it has Opposed Blade Dampers (OBDs). Think of them as a series of double doors that can open and close in 5% increments. As the air goes where it is needed, you achieve your preferred temperature as energy efficiently as possible.

The Exact Air Regulator rewards you with smoother, quieter, more even airflow, and rewarded Advantage Air with an Australian Design Mark award for innovation.

AIR-CONDITIONING CHECKLIST

BEFORE YOU DECIDE ON A SYSTEM, MAKE SURE YOU HAVE ASKED THESE QUESTIONS.

The Air Management System

	Other Systems	Advantage Air System
Is the controller intuitive to use, with on-board help and people you can talk to should you experience any difficulty?		✓
Is each room zoned independently?		✓
Do the dampers have opposable blades for greater air delivery precision?		✓
Can the system be controlled from your smart device?		✓
Are the products Australian designed and manufactured for Australian conditions?		✓
Are the ductwork and fittings covered by a full 10-year warranty?		✓
Does the ductwork meet all Australian Standards (AS1530 and AS4254)?		✓
Does the filter come with a 10-year warranty?		✓

THE ADVANTAGE OF AUSTRALIAN-MADE.

e-zone is designed by Advantage Air, a family-owned Australian company that started out designing and manufacturing innovative ducted air-conditioning. In the last 20 years we have focussed more specifically on smart electronic control systems, including e-zone.

In this time we have earned a reputation for producing reliable, world-class products that make daily life easier and more comfortable. We take pride in designing and creating an Australian product that is world class. To achieve this, we embrace technology and invest heavily in research and development.

Our ingenious engineers have developed numerous industry firsts and earned us a number of patents, registered designs and design awards in the process. We are committed to quality and where possible, make our components in Australia.

Our consumer support centre is also based in Australia, so you'll always receive friendly, local support when you contact MyTeam.

CONSUMER SUPPORT.

At Advantage Air we are committed to the quality and user experience of our products, which is why we have our own consumer support centre. Whether it is to step you through an app update, assist with getting your e-zone and your WiFi talking to each other, or just to go over how to get the most out of your system, we are here to help. You can take comfort in the fact that it is staffed internally, not outsourced, assuring the quality of advice and service you will receive.

Note: Although most apps and routers work with our touchscreens there will be some that are not compatible. Please let us know if you have issues so that we can assist where possible.

COMPATIBILITY.

For details on compatible phones and devices please visit our website; www.advantageair.com.au/support

ACTIVATION CODE.

e-zone has an activation feature. A code may be required from your installer to activate your system after 21 days.

PEACE OF MIND WARRANTY.

Advantage Air components are well known in the industry for their quality, precision, strength and durability. To prove our confidence, we provide a;

- 10-year warranty on all ducting and mechanical components
- 5-year warranty on all electronic controls
